

## **Database Developer/Administrator**

### **Location**

Cleveland

### **Company**

Work on a team that is developing applications using current Microsoft technologies, where the solutions we develop enable the company's core business!

InfoAccess.net is an e-business enabling service, providing highly accurate transaction services to companies in the Consumer Packaged Goods ("CPG") industry. In our hosted environment, we presently provide the seamless flow of over 175,000 transactions per month representing over \$4 billion in annual business-to-business e-commerce for over 1,200 clients.

### **Responsibilities**

The successful candidate will:

- Design and Develop database structures to meet all software Development needs.
- Develop database procedures and triggers that enable e-business/e-commerce transactions between clients and their trading partners.
- Provide assistance with client problem escalation.
- Provide test database platforms for Quality Assurance and Development staff.
- Assist with administration and performance monitoring of all relational databases.
- Work closely with all internal team members and client representatives.
- Administer and manage a server farm housing over 90 databases.

### **Requirements**

The successful candidate will have:

- A minimum of 2 years development experience with Microsoft SQL Server 2000, Data Transformation Services and Analysis Services.
- Experience writing Stored Procedures and Triggers in a transaction-processing environment.
- Experience working with clients and internal development staff to create designs and estimate project timelines.
- Experience working in a team environment.
- Knowledge of EDI, XML, and XSLT preferred.
- Excellent communication skills.
- Knowledge of: CPG industry, order and invoice processing preferred.
- Experience in a multi-client, service based organization preferred.
- MCDBA certification a plus.

In addition to an excellent compensation package, InfoAccess.net offers the opportunity to become an integral team member as we become a major force within the e-business market-space.
