

How Will You Conduct E-Business with Your Entire Supply Chain?

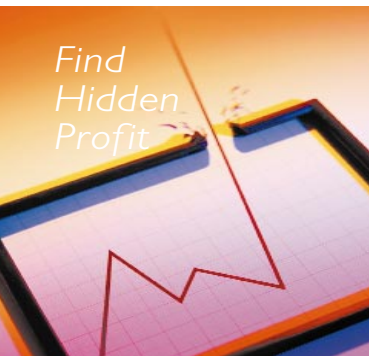

About InfoAccess.net

InfoAccess.net offers businesses the capability to connect with their brick & mortar trading partners and manage all of their orders and invoices as if they were electronic documents.

We enable our clients to conduct e-business with 100% of their trading partners without changes to business processes. Through our data verification processes, our e-business services are able to provide you and your trading partners with 100% accurate orders, invoices and supporting documents.

InfoAccess.net has over 23 years of experience providing e-business services to the consumer goods supply chain. We are based in Cleveland with offices in Chicago, Dallas and Los Angeles and have an Alliance Partnership with Sterling Commerce.

The Value We Provide

COST REDUCTION — *we save you money* — through increased order & invoice accuracy, reduced invoice deductions, faster invoice reconciliation time, and reduced paper and manual processes.

RISK REDUCTION — *we're safe* — with over 23 years of e-business experience, we already conduct e-business with many of your current trading partners and we leave your existing information systems alone.

INCREASED ROI ON IT — *we leverage your existing systems* — we can get all of your trading partners into your existing EC/EDI system, ERP system, web-based portal or e-marketplace, providing greater utilization and increased ROI.

BETTER INFORMATION — *we add value* — after processing your orders, invoices and supporting documents, we're able to provide you with reports designed specifically for your business and online tools for analyzing sales and ordering patterns.

GROW YOUR BUSINESS — *we knock down barriers* — if you're struggling to do business with certain trading partners based on their/your lack of electronic capabilities, you'll be able to do business with them through InfoAccess.net. With our "co-sourced" order management service, you'll worry less about the technology and focus more on your core business.

SPEED OF IMPLEMENTATION — *we're quick* — with no software to install, clients are up and running much quicker than typical in-house solutions.

"We have thoroughly enjoyed our partnership and have been equally impressed by InfoAccess.net's commitment to service. They've helped us make the impossible possible."

Victoria Wilinski, Director of Purchasing, BIGWORDS.com

Success Stories

DOW 30 MANUFACTURER — By connecting over 900 suppliers, we helped our client achieve 99.9% invoice accuracy, saving them over \$1.5 million annually in invoice matching & reconciliation overhead.

TEXTBOOK E-TAILER — In just 15 days, we connected our client's back office electronic ordering processes to over 100 of their largest suppliers, allowing them to fulfill customer orders during the peak demand of the fall semester.

HOUSEHOLD PRODUCTS COMPANY — By enabling e-business transactions for over 200 substantial customers, our client avoided over \$2 million in capital, resource and overhead expenses associated with implementing an in-house system solution.

CONSUMER GOODS MANUFACTURER — By optimizing order levels, we enabled our client to reduce their inventory by 46%. Sales also increased by 35% due to the reduction in out-of-stock items.

FRUIT GROWERS COOPERATIVE — Utilizing our order optimization service, our client reduced their inventory by over 40%, increased inventory turns from 14 to 35, reduced transportation expenses by 46%, and improved in-stock service levels from 95% to 99%.

GREETING CARD COMPANY — With complete e-business outsourcing, our client was able to improve customer relationships. By invoicing customers in their preferred electronic and non-electronic formats, our client received payment up to 78 days earlier. During the first week of service, over \$2 million in past due receivables was collected.

Why We're Different

OUR SERVICES:

- Can offer data verification & correction, as well as data translation & transfer
- Can achieve 100% accurate invoices
- Can be implemented without changing existing information systems
- Can offer order, invoice, and time-based analysis as a significant value-added result
- Do not require software installation

INFOACCESS.NET HAS:

- Over \$4 billion in transactions processed annually
- Over 175,000 transactions processed per month
- Over 1,200 customers
- Over 23 years of e-business experience
- Many industry-specific transaction engines
- Several alliance partners
